

Shashank Shukla

Senior DevOps / Platform / SRE Engineer

 Shashank Shukla  Portfolio  7737602733  shashank.shukla1202@gmail.com  Bangalore, India

Profile

DevOps / Platform / SRE engineer with 5+ years building and running **AWS, GCP and Kubernetes platforms**. Builds **private-cloud delivery, AI-driven operations (AIOps)** and self-hosted AI infrastructure, with a focus on reliability, observability and cost. Leads small DevOps teams that support multiple product teams.

Experience

Nielsen | Bangalore, India

Senior DevOps Engineer | Jun 2025 – Present

- **Private-cloud deployment platform:** built from scratch to ship the full product into each customer's **AWS or GCP account from one config file** (Pulumi, Terraform, Argo CD); cut deployments from **6–7 hours to 48 minutes** and now runs releases for 4 live customers.
- **AI incident response:** Amazon Bedrock LLMs triage Prometheus alerts, **auto-resolve ~60% of Kubernetes alerts** via runbooks and escalate the rest with context.
- **Self-hosted SLMs on EKS:** 2 models run as a fleet via a custom Kubernetes CRD, at **~4x lower cost**.
- **Observability & incident management:** built the Prometheus, Alertmanager, Loki and Grafana stack and rolled out **incident.io** for alert routing, incident response and on-call support rotations.
- **Led a 4-member DevOps team** supporting 5–6 application teams; owned GitLab CI, JFrog Artifactory + Vault and a Docusaurus developer portal.
- Architected end-to-end infra for a real-time Ads platform with **<10ms latency** — ScyllaDB/Aerospike POC, AWS Local Zones & Global Accelerator.
- **EKS reliability across 8+ clusters:** zero-downtime v1.32→v1.34 upgrades, NodeLocalDNS, Node Problem Detector, Registry Proxy Cache and blue-green deployments; node memory swap **cut OOM kills ~70%**.
- **Cut infrastructure costs 25–40%** by consolidating 20+ ALBs behind NGINX Ingress, adopting Graviton ARM with multi-arch builds and right-sizing Karpenter.
- **Security:** Kyverno admission policies, Vault dynamic secrets (K8s auth + AWS STS), and led CrowdStrike remediation across 15+ AWS accounts.

Conga | Bangalore, India

Associate → Senior DevOps Engineer | Jul 2021 – Jun 2025

Senior DevOps Engineer (Apr 2024 – Jun 2025) · DevOps Engineer (Apr 2023 – Mar 2024) · Associate (Jul 2021 – Mar 2023)

- **Led a 6-member DevOps/SRE team**, setting deployment standards, runbooks and SRE practices.
- Automated infrastructure with **Terraform** and templated **Helm** charts, cutting release cycles from **2 weeks to 3 hours**.
- Built **KEDA** autoscaling for NGINX (Prometheus metrics) and AWS SQS consumers.
- Rolled out the observability stack and **Doppler** secrets management, **halving MTTR**.
- Built a **FastAPI** SaaS platform (60+ endpoints) with canary CI/CD, and a Python data-migration orchestrator.

Skills

Cloud & Kubernetes: AWS (EKS, EC2, ALB, SQS, MSK, Bedrock), GCP, Kubernetes, Karpenter, KEDA, Helm, Docker

IaC, GitOps & CI/CD: Terraform, Pulumi, Argo CD, GitLab CI, Jenkins, JFrog Artifactory

Observability & SRE: Prometheus, Alertmanager, Grafana, Loki, CloudWatch, incident.io

AI / LLMops: Amazon Bedrock, self-hosted SLMs on EKS, Kubernetes CRDs

Security: Kyverno, HashiCorp Vault, AWS STS, CrowdStrike

Languages & Data: Python, Go, Bash · Kafka/MSK, Redis, MongoDB, ScyllaDB, Aerospike

Education

B.Tech in Computer Science and Engineering | Jul 2017 – Jun 2021 

Bangalore

M.S. Ramaiah University of Applied Sciences | **CGPA: 9.0**

Certifications & Talks

- Certified Kubernetes Administrator (CKA)
- HashiCorp Certified: Terraform Associate
- Talk on scalable Kubernetes architecture at an internal engineering conference (200+ attendees)
