 Shashank Shukla  Portfolio  7737602733  shashank.shukla1202@gmail.com  Bangalore, India

Profile

DevOps/SRE Engineer with 5+ years of experience in AWS, GCP and Kubernetes **infrastructure design, automation, and scaling**. Focused on **operational efficiency and system reliability**, with a track record of **reducing costs, improving deployment processes**, and building private-cloud delivery, AIOps and self-hosted AI platforms.

Experience

Nielsen | Bangalore, India

Senior DevOps Engineer | Jun 2025 – Present

- Architected and built from scratch a **private-cloud deployment platform** that ships the full product into each enterprise customer's own **AWS or GCP account from a single config file**, using infrastructure-as-code and GitOps.
- Built **AI-driven incident response**: Prometheus alerts trigger **Amazon Bedrock** LLMs grounded in an org knowledge graph (docs, runbooks) that **auto-resolve minor issues** via matched runbooks and hand the rest to on-call with context.
- Self-hosted small language models (SLMs) on EKS**, managed as a fleet via a custom Kubernetes **CRD**.
- Architected end-to-end infra for real-time Ads platform, **<10ms latency** via ScyllaDB/Aerospike POC, AWS Local Zones & Global Accelerator, **serving millions of daily ad decisions**.
- Cut infrastructure costs 25–40%** — consolidated 20+ ALBs behind NGINX Ingress (**95% lower load balancer spend**), led Graviton ARM adoption with multi-arch builds, and right-sized Karpenter autoscaling (**25% lower compute spend**).
- Drove **EKS reliability across 8+ clusters — zero-downtime v1.32 → v1.34 upgrades**, NodeLocalDNS, Node Problem Detector, Registry Proxy Cache & blue-green deployments; enabled **node memory swap** to cut OOM crashes.
- Owned CI/CD platform — GitLab runners, JFrog Artifactory + Vault integration, and a **Docusaurus developer portal**.

Conga | Bangalore, India

Senior DevOps Engineer | Apr 2024 – Jun 2025

- Architected** KEDA-based autoscaling for **NGINX** (via Prometheus) and **AWS SQS consumers**, optimizing resource usage.
- Led a 6-member DevOps/SRE team** implementing Site Reliability practices.
- Developed** SaaS API platform with **FastAPI (60+ endpoints)**; implemented CI/CD with canary rollouts.
- Engineered** a Python-based workflow orchestration tool for data migration, increasing automation coverage by 80%.

DevOps Engineer | Apr 2023 – Mar 2024

- Automated** infrastructure using **Terraform**, enabling HA & scaling, reduced release cycles from **2 weeks to 3 hours**.
- Deployed **observability stack and Doppler** for secrets management; reduced MTTR by 50%.
- Orchestrated microservice **deployments** for **React, Angular, Java, and Python** apps, reducing deployment time by **60%**.

Associate DevOps Engineer | Jul 2021 – Mar 2023

- Created **templated Helm charts**, cutting deployment setup time by **40%**.
- Automated **CI/CD pipelines** using **Groovy & Shell scripts**.

Skills

Core Technologies: AWS (EC2, EKS, ALB, SQS, CloudWatch), GCP, Kubernetes, Docker, Terraform, Helm

CI/CD & Automation: Jenkins, Spinnaker, GitLab CI, Rancher Fleet, GitOps workflows

Monitoring & SRE: Prometheus, Grafana, Loki, Cloudwatch, Amazon Bedrock (AIOps)

Programming: Python, Bash, Groovy, Go

Data, Messaging & AI: MongoDB, Kafka/MSK, Redis Streams, ScyllaDB, Aerospike, self-hosted SLMs

Education

B.Tech in Computer Science and Engineering | Jul 2017 – Jun 2021 

Bangalore

M.S. Ramaiah University of Applied Sciences | **CGPA: 9.0**

Accomplishments

- Delivered technical presentation on scalable Kubernetes architecture at internal conference (200+ attendees)
- Achieved 95% cost reduction in AWS ALB infrastructure through strategic consolidation

Certificates

- Certified Kubernetes Administrator (CKA)
- HashiCorp Certified: Terraform Associate
